

What to do in case of an emergency

Try to stay calm to help your child

Ingestion

Get medical help

**If the child is not
vomiting, do not
induce this**

Eye or skin splashes

**Rinse cautiously
with water for
several minutes**

Get medical help

Medical help

**The doctor may need the
following information**

- When did this happen?
- What are the symptoms?
- What first-aid measures did you perform?
- What is the age and/or weight of the child?
- Does the child have known allergies?
- How much has been swallowed or splashed into the eye or onto the skin?
If the entire capsule is gone, it is probably about 25-30 milliliters.
- What is the brand name of the product?
- Have the original product packaging or label at hand.

How to contact the NHS Helpline
